The private cloud brings efficiency, agility, and capability to your datacenter. A private cloud infrastructure in which database services are easily provisioned, well managed, and highly available allows you to easily keep up with new business requirements on demand. Learn how this new environment can increase productivity and help deliver better quality of service.

Reduce Costs
Reducing your overall server footprint in the datacenter directly translates to lower power consumption, cooling, and rack space.

Build in Elasticity
Scalability, flexibility, and a great user experience. Let us show you how out-of-the-box solutions put your IT and application owners on the same team.

Operational Insight
Know now! Real-time trending and performance indicators allow you to make sure your database service meets or exceeds business SLAs.

Microsoft Technology Centers (MTCs)
The MTC offers a unique combination of immersive experiences and side-by-side collaboration with world-class architects to provide the optimal environment to learn about and apply new technologies. Your briefing will include mutual discovery, tailored solution drill-downs, and expert presentations culminating with the delivery of a clear and actionable vision of how the Microsoft platform can help you reach your business goals.
Strategy Briefing

Each briefing is tailored to your specific business drivers and requirements and facilitated by an MTC architect. This is a sample agenda.

9:00 am Introductions and Discovery
Through introductions and discussion of your business challenges, we will explore initiatives and issues that impact the way you conduct business and that will help us provide a contextual presentation throughout the day.

10:00 am Economy Through Consolidation
Open discussion and presentation on how to inventory and gather performance metrics to properly size a private cloud, including best practices and considerations around a consolidated infrastructure. Discuss levels of service and SLA requirements.

Noon Lunch

1:00 pm Manage Applications and Servers
Discussion and presentation on how the Microsoft platform can enable cloud benefits of scale and reliability for your application portfolio.

2:00 pm Multi-Server and Performance Management
There are many capabilities to manage both configuration and performance within an enterprise. This session will review those capabilities and best practices.

3:00 pm Use the Technology
We provide a facilitated, hands-on environment where business and IT decision makers can experience the vision of Microsoft's platform firsthand.

4:00 pm Wrap-Up and Next Steps
You'll have a clear and actionable plan to help guide your organization through the evaluation and application of Microsoft solutions.

To take advantage of the Microsoft Technology Center near you, please contact your Microsoft account team for details.
